Dental phobia relief through conscious sedation

SINCHON DAIN DENTAL HOSPITAL Conscious Sedation Implant

conscious sedation allows patients to receive implant more comfortably.

WHAT IS CONSCIOUS SEDATION?

Conscious sedation induces an optimal sedative state where patients are responsive to external stimuli and breathing spontaneously during treatment.

Relieve fear and anxiety of dental treatment

SINCHON DAIN DENTAL HOSPITAL Conscious Sedation Dental Treatment

We induce patients to a state of conscious sedation, alleviating fear and anxiety, and enabling patients to comfortably receive dental care in various treatment areas.

Patient monitoring equipment for conscious sedation treatment

The patient's blood pressure and heartbeat are continuously monitored in real time basis while conscious sedation treatment is performed.

Separate recovery room for speedy recovery after surgery

A separate recovery room is available for patients to recover after conscious sedation treatment
