Skin/Obesity Clinic

» Petit/Anti-aging

Our treatment prevents skin aging, improves elasticity, improves facial contours, and replenishes moisture. Reduce the burden with a beauty total solution that can solve various skin problems. It consists of a procedure that can expect a faster effect.

» Whitening

Customized treatment for each age and skin type

Customized treatment for each age group and skin type. Increase the effectiveness of treatment through tailored treatment.

» Acne care

PDT treatment

This is a treatment that reduces the activity of the sebaceous glands and kills acne bacteria by applying a photosensitizer to the skin, allowing it to be absorbed by the sebaceous glands, and then using the light that reacts with it.

Various high-tech equipment

Personalized treatment is possible with various high-tech equipment tailored to the skin condition and situation.

Skin scaling

It finely peels off the stratum corneum of the skin to open the clogged pores and promotes the growth of new cells to relieve acne.

» Nutritional injection

Nutritional injections simply and quickly replenish essential nutrients that are easily deficient in busy modern people. Insufficient nutrients cannot be met with food and nutritional supplements alone, so imbalances may appear in the body. Nutritional injections can solve these imbalances in the body.

Customized treatment is available

Considering that each individual has different detoxification ability and biochemical characteristics, and genetic characteristics may be expressed differently, customized nutritional therapy can be provided.

Easy to supply nutrients

By supplying the necessary elements for body activation and immunity enhancement, our body can easily receive mineral elements that are easily deficient.

Body clinic

» Shrink body lifting

Non-invasive treatment is possible using high-intensity focused ultrasound, and quick daily life is possible after the procedure. It is effective for body tightening by relocating chronic fat cells. It is effective not only for face lifting, but also for reducing the elasticity of the entire skin.

» Special body toning

Body toning using a single wavelength laser that only works on melanocytes, not on normal cells in the skin. It is suitable for the treatment of easily exacerbated and recurrent pigmentation. A high toning effect can be expected by reducing damage to normal skin and selectively destroying only melanocytes.

Feminine plastic surgery

» VIVEVE

Viveve is a laser device that has proven to be safe and effective, with more than 1 million women being treated in 65 countries around the world. Korea is the only country that has been **approved for treatment effectiveness and safety for vaginal atony**, and there are zero cases of side effects reported so far. (as of May 2020)

The existing version of Viveve 1.0 was also very effective in treating, but our Clinic introduced an upgraded version of **Viveve 2.0** in May 2020 to provide higher satisfaction.

» Labia minora Laser Secret plastic surgery

The labia minora is a place where a lot of nerves and blood vessels are distributed, it requires not only a beautiful shape but also sophisticated surgery. There should be no problems with functions such as sexual sensation, skilled treatment experience is important. Our Clinic finds 1:1 customized petal design and confidence according to the shape, thickness, and length of the labia minora.

» Gold thread Vaginal tightening

Gold thread treatment is a treatment that improves vaginal dryness, is effective in tightening, and makes the quality healthy and young. If 99.9% of fine gold thread is inserted into the subcutaneous area of the vagina, foreign body reactions are induced, which is effective in collagen and capillary production.
