Core Values

At Gangnam Grand Eye Clinic, we are committed to providing the highest level of medical care for both your eyes and your heart. We focus our core values on two key areas—Care and Solution—to ensure the best possible experience.

With heartfelt **attention(Care)** and **effective treatment(Solution)**, we always strive for excellence.

Core Values Care - 1

Personalized Ophthalmic Care

Just as not everyone with poor eyesight has the same vision, we provide personalized one-on-one treatment tailored to each customer's individual eye condition.

100%

For the safety of our customers, we provide a Vision Correction Certificate and a Premium Multifocal Intraocular Lens Warranty to everyone who undergoes surgery.

16×60

To ensure an accurate and personalized diagnosis, we conduct 60 detailed tests across 16 stages.

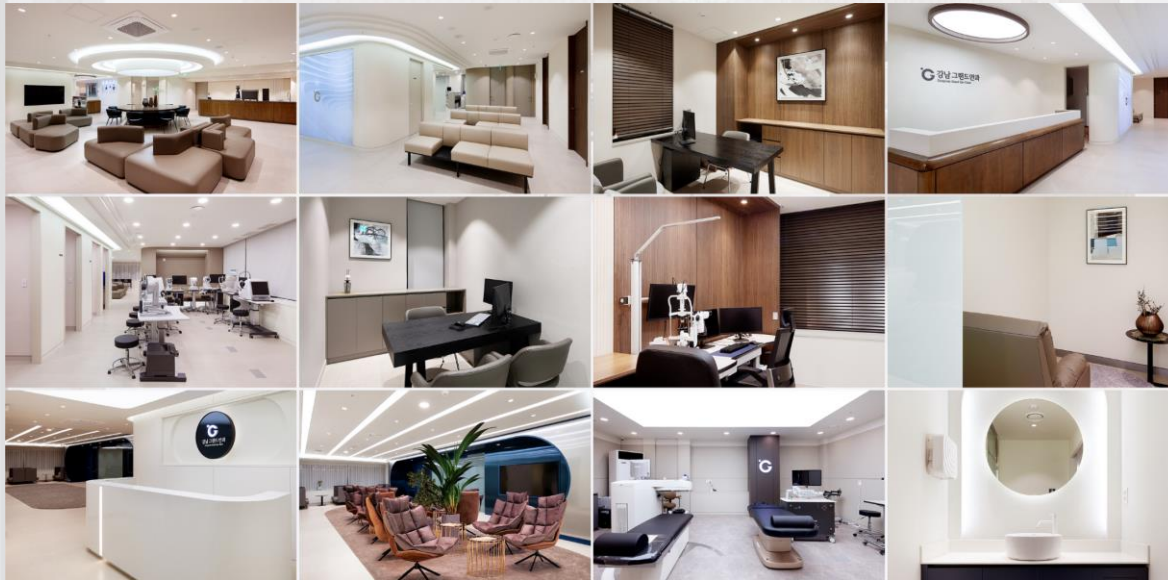

1:1

We offer one-on-one customized treatment tailored to each customer's unique eye condition.

Core Values Care - 2

A Comfortable Clinic Environment

Located right in front of Exit 5 of Gangnam Station, Gangnam Grand Eye Clinic offers a seamless experience with consultations and eye examinations on the 4th floor Eye Care Center and surgeries on the 5th floor for your convenience and comfort.

Core Values Solution - 1

Specialists Focused on Eye Disease — Gangnam Grand Eye Clinics

The core of ophthalmic care lies in the experience of the medical team.

At Gangnam Grand Eye Clinic, our highly skilled ophthalmologists — specializing in complex eye surgeries and retinal disorders — focus on individualized diagnosis and treatment for each customer's unique eye condition.

Awarded the Excellence Prize for Academic Video at the 2025 Korean Ophthalmological Society Annual Scientific Conference

Selected as one of Korea's Top 100 Good Doctors in 2021

Awarded the 2021 Medical & Health Social Contribution Grand Prize in the Presbyopia and Cataract Treatment Category

Ranked No.1 in the 2021 Korea Consumer Satisfaction Index for Presbyopia and Cataract Treatment

Core Values Solution - 2

Advanced Ophthalmic Equipment

The difference in equipment makes the difference in the results.
From diagnostic tools to surgical systems, we continuously upgrade our technology to provide the highest quality of medical care.

Special – Personal-Eyes

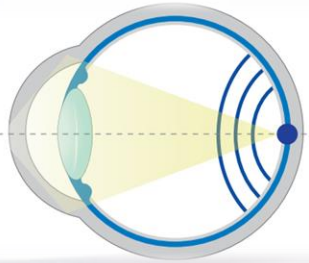

The Most Advanced Personalized Laser Vision Correction

Using precise measurements from your eyes and cutting-edge ray-tracing technology, we create a customized 3D model to perform vision correction that can achieve up to 2.0 visual acuity — offering the highest level of personalized treatment available today.

Advantages of Personal-Eyes

- AI-powered optimization for precise correction
- Accurate correction of high-order aberrations
- Improved night vision with reduced glare
- Fast recovery time
- Potential visual acuity up to 2.0

Personal-Eyes : A New Era of Customized Vision Correction

Personal-Eyes is an advanced customized procedure that effectively corrects even the slightest refractive errors by analyzing the front and back surfaces of the cornea, anterior chamber depth, aberrations, lens thickness, and more.

Personal Eyes-SIGHT MAP

Special – Contoura Vision

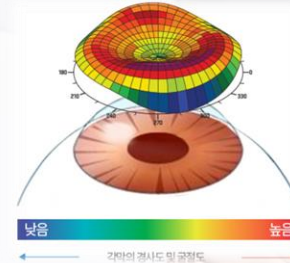

Customized Vision Correction Tailored to Your Corneal Profile

We use *Contoura Vision* to provide personalized vision correction based on each individual's unique corneal characteristics. Contoura Vision maps the specific shape, curvature, and refractive pattern of each eye, enabling truly customized correction.

Advantages of Contoura Vision

- 3D mapping of asymmetrical corneal surfaces
- Smoother corneal reshaping for reduced glare and halos
- Effective correction for myopia, astigmatism, and irregular corneal shapes
- Surgery tailored to corneal shape, degree of myopia/astigmatism, and pupil size
- Fast recovery time

22,000 Data Points for Precision Mapping

By analyzing 22,000 points on the cornea, we create a detailed topographic map unique to each customer — delivering not just better vision, but higher visual quality.
